Exploring Québec for spodumene-rich pegmatite lithium deposits to supply the next generation of lithium-ion batteries

WORLD CLASS REGION

Pontax is located in Canada's James Bay district - one of world's hottest lithium regions.

Adjacent to world class lithium projects.

FUNDED

Joint venture partner fully funded to execute on exploration strategy.

Stria has \$3M in bank with payments due shortly of \$2M.

RAPID GROWTH

Drilling has already outlined Spodumene over 700m strike.

Already doubled the known depth of mineralization and potentially found a replication.

Clearly visible pegmatites mapped and sampled over 20km.

Maiden Resource due mid 2023.

SHARE STRUCTURE

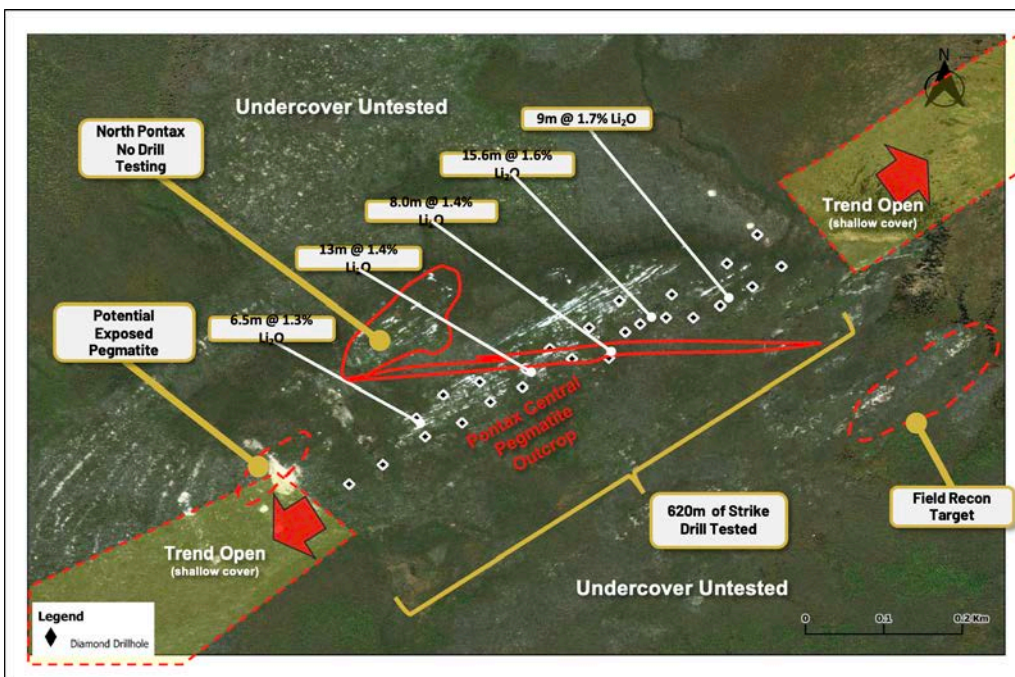

Tight share structure of 25M issued and 39M fully diluted.

Low burn rate.

Stria carried interest in project to feasibility stage.

"... there is a real threat that U.S. companies will not be able to benefit from domestic and global market growth... Our supply chains for the transportation, utility, and aviation sectors will be vulnerable and beholden to others for key technologies."

The Department of Energy (DOE) "National Blueprint"

Pontax Central Drill Target

- Over 700m of strike extent on central outcrop area which remains OPEN under shallow cover.
- High-grade Lithium bearing pegmatites from surface tested to 230m.
- Open at depth and thickest intersection in historic drilling (15.6m @ 1.6% Li₂O from 83.9m) in deepest drilling .
- Multiple untested pegmatite outcrops at Pontax North - priority target for follow up.
- Walk up drill targets and resource definition drilling planned for immediate exploration programs.

LITHIUM SUPPLY AND DEMAND

Significant supply gap emerging for lithium as market is expected to grow to over 2 Mt in 2030 and continue growing

Expected lithium demand and supply
(million tonnes of LCE)

“The lack of a substantial lithium battery supply chain in the United States and the lack of secure access to energy materials pose serious threats to U.S. national and economic security.”

Li-Bridge, public-private alliance

Governments In Action

Biden funding North American minerals

Canada invests \$1.5B and partners to build battery plant in Ontario

Canada announces intent to create the Canada Growth Fund (CGF) to be capitalized with \$15B

- The Pontax Lithium Project covers 145km. sq. and 10km of strike along the highly prospective Chambois Greenstone Belt.
- Preliminary shallow drilling in 2017 and 2020 found lithium-bearing spodumene deposits in 17 of 18 test holes. The best intercept was 21.39m grading 1.16% Li₂O in drill hole 975-17-0142, comparable to other properties in the region.
- In July, 2022, Stria entered into a partnership with Cygnus Gold Limited (ASX:CY5) in Western Australia, home to some of the world's largest hardrock lithium deposits.
- Cygnus made a \$1M payment upon signing the agreement, invested directly in Stria Lithium and committed to invest up to an additional \$15M in the project.
- Cygnus is committed to fully funding and managing the current two-stage exploration and drilling program up to \$10M at the Pontax property. Additionally, it will also pay Stria up to \$6M in cash. In return, Cygnus has an exclusive option to acquire up to a 70% interest in the property.
